Aslam Aliyu

Long Island City, NY | (646) 639-9450 | aslamaliyu@gmail.com | linkedin.com/in/aslamaliyu | aslamaliyu.com

EDUCATION

Binghamton University, Thomas J. Watson College of Engineering and Applied Science
Bachelor of Science in Computer Engineering — *May 2023*
Master of Science in Industrial Engineering — *December 2025*
Relevant Coursework: Neural Networks & Deep Learning, Computer Network Architecture, Digital Logic Design

SUMMARY

Software engineer with experience across full-stack development, AI applications, data systems, and client delivery. Builds enterprise integrations at IBM, owned the product roadmap at an AI startup, and built TaylrdUp, a full-stack Claude API app, solo. Background in computer and industrial engineering.

SKILLS AND LANGUAGES

Programming Languages: Python, TypeScript, JavaScript (ES6+), SQL, C/C++, HTML5/CSS3
Frameworks & Libraries: React, React Native, Next.js, Node.js, Express, FastAPI, TensorFlow, Pandas
Tools & Platforms: PostgreSQL, AWS, Docker, Git, GitHub Actions, Oracle Integration Cloud, Claude API, Claude Code
Concepts: Full-Stack Development, AI and LLM Applications, Data Pipelines and ETL, REST APIs and System Integration, Client-Facing Delivery, Product and Sprint Ownership

PROFESSIONAL EXPERIENCE

IBM, *Associate Application Developer* | Baton Rouge, LA — *July 2026 – Present*
- Build Oracle Integration Cloud API workflows connecting ERP and EPM financial systems for an enterprise client
- Meet with the client's team to map their business processes onto Oracle Fusion ERP and PPM workflows
- Migrate the client's legacy data onto Oracle Fusion, automating data entry with SQL-driven forms

Uplifty AI, *Product Manager Intern* | New York City, NY — *July 2025 – April 2026*
- Owned the mobile product roadmap through an Alpha rollout to 2,300+ students at selected schools
- Prioritized referral, rewards, and badge features from functional specs, clarifying requirements with team leads
- Defined acceptance tests for each sprint release to verify features before they reached users

Amphenol Aerospace, *Software Engineering Intern* | Sidney, NY — *May 2022 – August 2022*
- Built a real-time Ignition SCADA dashboard tracking cycle time, tool wear, and job queues across 50 machines
- Developed Python and SQL ETL pipelines that migrated production data across servers with zero downtime
- Diagnosed query bottlenecks and restructured database indexes, improving retrieval speed by 66 percent

Flexisaf, *Software Engineering Intern* | Abuja, Nigeria — *June 2019 – August 2019*
- Developed a secure payment portal using JavaScript and REST APIs, scaling to 50+ institutional clients
- Investigated billing data mismatches across 89 accounts, traced root causes, and deployed corrective fixes
- Added real-time payment status tracking that gave parents and administrators visibility into billing

PROJECT EXPERIENCE

TaylrdUp, *Full-Stack AI App* | *Solo Developer* — *February 2026 – Present*
- Built an AI resume app solo on Next.js, FastAPI, Supabase, and the Claude API, with 1,000+ resumes in testing
- Wrote a checker that measures rendered LaTeX line width and sends overflowing bullets back to Claude to shorten
- Redesigned onboarding from a 5-step wizard into a single-page profile builder to cut friction for new users

CardWise AI Intelligent Transaction Insight Tool, *Personal Project* | *Solo Project* — *April 2025 – Present*
- Engineered an OCR and NLP pipeline that extracted and classified receipt data with 91 percent accuracy
- Split OCR, entity extraction, and Hugging Face classification into separate endpoints so models could be swapped
- Automated validation workflows that reduced manual data entry by 75 percent across transaction processing

Lockheed Martin Sponsored Autonomous Car, *Software Lead* | *Group Project* — *September 2022 – April 2023*
- Trained TensorFlow CNNs for object detection on Nvidia Jetson hardware, reaching 95 percent accuracy
- Chose a vision-only design over LiDAR, then used TensorRT on a Jetson Nano to cut inference latency by 0.03 seconds
- Improved the car's response to moving objects and roadblocks by 32 percent while leading a team of 4

AFFILIATIONS AND LEADERSHIP EXPERIENCE

National Society of Black Engineers, *Member* — *September 2020 – Present*
- Organized career workshops and networking events, driving member engagement and professional development

Binghamton University Student Association, *Congressman* — *September 2021 – May 2023*
- Managed a $1M yearly budget across 100+ student organizations using data-informed allocation decisions

Theta Tau Professional Engineering Fraternity, *Diversity and Inclusion Chair* — *September 2021 – May 2023*
- Mentored 15+ underrepresented students through DEI workshops and engineering community programming
